

## The Arts

Freeman Academy offers a college preparatory curriculum with a creative arts emphasis. All students are given the opportunity to pursue their God-given talents through the arts.

Pottery

Drawing

Painting

Photography

Graphic Art

## Art

Our students are encouraged to express themselves through a variety of mediums. All students in grades 1-12 are able to produce hand-thrown pottery on site. They also have the opportunity to create other visual art using many types of materials. High School students may choose to be involved in set design and painting for the school's drama productions.

In our art classes, students explore and analyze the various tools, techniques and processes of drawing, painting, and ceramics. Art classes also included an introduction to art elements, principles of design, and art history. Students learn digital art in the Communication Technology class by creating posters and publications using Adobe Photoshop and InDesign.
